

## Concrete Mini Loft

Gdynia

©Tom Kurek/Alicja T. Agency

Design by LOFT Magdalena Adamus

The developer has originally conceived this space as a communal club room for the residents of a brand new apartment complex. However when the concept has changed Magdalena Adamus was asked to convert it into a loft apartment. That small 23 sqm space was creatively converted into two level apartment thanks to its 5m height. It contains a bedroom and a full size bathroom on the upper level and an open space living-room with kitchen plus a toilet downstairs. The architect has made a point of decorating this space using only the Polish craftsmen, artwork and furniture. The mini loft is located 500 m from the beach, in a complex of luxurious apartments.
