ED & ADV

Asia's childhood is connected with Scandinavia. When she was designing her own house, she dreamed of introducing as many elements from those times as possible. The house, where she lives with her partner and son and a beautiful dog, is located on a slope with a beautiful view of the river. The house has a functional layout with a clear division into the day and night areas. The living room is directly connected to the kitchen, dining room and communication, which makes this space seem extremely spacious. In the night part there are bedrooms and a bathroom of the household members. Characteristic elements of the interior are wooden ceiling beams, natural wood used in many ways, from paneling, floors to carpentry, warm colors and decorative elements in the style of ethno nature. Asia likes colors, especially blue which also appears in the colors of the facade of the house. The family likes to sit on the porch of the house overlooking the escarpment. "We eat here, rest and read books" says Asia. The garden is a permanent playground for the owner's son and his dog. They all enjoy spending time outdoors around their beautiful home together. They also create a garden that is still under construction, but they are already enjoying the first effects of flowering plants planted around the house.
